Professional profile

I'm a dedicated and innovative full stack web developer who is passionate about technology and how it can be used to solve problems. My greatest source of joy is seeing solutions I crafted solving the problems of fellow humans.

I write clean, maintainable and scalable code because I believe in the quest to solve problems for the everyday man I shouldn't create new ones for developers trying to maintain my code.

I also practice Test Driven Development.

I understand that the tech landscape changes very often and that makes my ability to pick up new skills easily very efficient to my employer.

Education and qualifications

2012 - 2017: B.Eng. Computer Engineering (Second Class Honours: Upper Division)
